HOW RISKY IS IT?
The value of the Fund can go down as well as up. You could lose money.

One way to gauge risk is to look at how much a fund’s returns change over time. This is called “volatility”.

In general, funds with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. Funds with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

RISK RATING
Beutel, Goodman & Company Ltd. has rated the volatility of this Fund as **medium**.

This rating is based on how much the Fund’s returns have changed from year to year. It doesn’t tell you how volatile the Fund will be in the future. The rating can change over time. A fund with a low risk rating can still lose money.

HOW HAS THE FUND PERFORMED?

A WORD ABOUT TAX
In general, you’ll have to pay income tax on any money you make on a fund. How much you pay depends on tax laws where you live and whether or not you hold the Fund in a registered plan, such as a Registered Retirement Savings Plan, or a Tax-Free Savings Account.

Keep in mind that if you hold the Fund in a non-registered account, fund distributions are included in your taxable income, whether or not they are received in cash or reinvested in additional units of the Fund.

HOW MUCH DOES IT COST?
The following table shows the fees and expenses you could pay to buy, own and sell Class F units of the Fund. The fees and expenses – including any commissions – can vary among classes of a fund and among funds. Higher commissions can influence representatives to recommend one investment over another. Ask about other funds and investments that may be suitable for you at a lower cost.

1. Sales Charges
Class F is a no load option. Sales charges are not applicable.

2. Fund Expenses
You don’t pay these expenses directly. They affect you because they reduce the Fund’s returns.
